

SRITAM MOHAPATRA

Bhubaneswar, Odisha | +91 7327818780 | sritammohapatra7@gmail.com | linkedin.com/in/sritam-mohapatra-0b2732294

PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science student (2023–Present) with hands-on experience in full-stack web development using the MERN stack. Completed two internships building real-world applications. Proficient in JavaScript, React, Node.js, Express, and MongoDB. Eager to contribute to scalable web application development as a Full-Stack Developer Intern.

TECHNICAL SKILLS

- Frontend: React.js, HTML5, CSS3, Responsive Web Design, JavaScript (ES6+)
- Backend: Node.js, Express.js, REST APIs
- Databases: MongoDB, Basic SQL
- Languages: JavaScript, Python, Java, C
- Tools & Platforms: Git, GitHub, VS Code, MS Office (Word, Excel, PowerPoint)
- AI/ML Basics: Regression, Classification, Neural Networks
- Cloud/DevOps: Exposure to CI/CD concepts; learning AWS/GCP basics

INTERNSHIP EXPERIENCE

Web Development Intern

May 2025 – July 2025

Central Tool Room & Training Centre (CTTC) | Bhubaneswar, Odisha

- Built a responsive Spam Mail Detection System using MERN stack technologies.
- Developed and styled multiple responsive web pages with a focus on front-end best practices.
- Gained hands-on experience in HTML, CSS, JavaScript, and React component development.
- Collaborated with mentors to understand real-world software development workflows.

Industrial Internet Of Things (IIOT)

July 2024

Bhubaneswar, Odisha

- Built a Doctor Appointment System using the Medix platform integrated with a MERN stack frontend and backend.
- Implemented a drag-and-drop scheduling interface in React, allowing patients to book and reschedule appointments intuitively.
- Developed RESTful APIs with Node.js/Express for managing doctor schedules, patient records, and appointment slots in MongoDB.

PROJECTS

Spam Mail Detection System (MERN Stack)

- Designed and developed a full-stack web application to detect and classify spam emails.
- Implemented responsive UI in React; connected to a Node.js/Express backend with MongoDB.
- Applied basic machine learning classification logic on the server side for spam filtering.

E-Commerce Website (MERN Stack)

- Built a full-stack e-commerce platform using React.js (frontend), Node.js/Express (backend), and MongoDB (database).
- Implemented product listing, cart management, user authentication (JWT), and order flow with REST APIs.
- Designed responsive UI components and integrated MongoDB for product and user data storage.

Deepfake Detection System (AI/ML + Python)

- Developed a deepfake detection system using pre-trained AI/ML models to classify real vs. manipulated media.
- Applied neural network-based classification (CNN/transfer learning) for image/video authenticity analysis.
- Integrated the model with a Python-based web interface to accept media uploads and return detection results.

UGC Ad Generation Website (MERN Stack + AI API)

- Built a full-stack web application that enables users to generate User-Generated Content (UGC) style advertisements using AI APIs.
- Designed React-based UI for ad input, preview, and export; Node.js/Express backend handles API orchestration.
- Demonstrates practical exposure to AI API integration and automation — directly matching the job’s “Good to Have” criteria.

EDUCATION

B.Tech – Computer Science and Engineering	2023 – Present
GIFT Autonomous, Bhubaneswar Biju Patnaik University of Technology (BPUT)	
Intermediate (12th)	2023
Marsaghai Higher Secondary School, Kendrapada	

CERTIFICATIONS

- NPTEL – Social Networks (IIT Kharagpur)
- NPTEL – Introduction to IoT (IIT Kharagpur)
- NPTEL – Industrial IoT 4.0 (12 weeks, IIT Kharagpur)
- NPTEL – Soft Skills Development (Leadership, Communication, Collaboration)

KEY STRENGTHS & INTERESTS

- Strong problem-solving and critical thinking skills
- Quick learner; actively improving TypeScript and cloud fundamentals
- Fluent in English, Hindi, and Odia
- Interests: Fitness training, logical puzzles — habits that reinforce discipline and analytical thinking
